PHILIPPINE BIDDING DOCUMENTS

Bidding for OWWA Virtual Machine and Cloud Computing Subscription

**Sixth Edition
July 2020**

Preface

These Philippine Bidding Documents (PBDs) for the procurement of Goods through Competitive Bidding have been prepared by the Government of the Philippines for use by any branch, constitutional commission or office, agency, department, bureau, office, or instrumentality of the Government of the Philippines, National Government Agencies, including Government-Owned and/or Controlled Corporations, Government Financing Institutions, State Universities and Colleges, and Local Government Unit. The procedures and practices presented in this document have been developed through broad experience, and are for mandatory use in projects that are financed in whole or in part by the Government of the Philippines or any foreign government/foreign or international financing institution in accordance with the provisions of the 2016 revised Implementing Rules and Regulations of Republic Act No. 9184.

The Bidding Documents shall clearly and adequately define, among others: (i) the objectives, scope, and expected outputs and/or results of the proposed contract or Framework Agreement, as the case may be; (ii) the eligibility requirements of Bidders; (iii) the expected contract or Framework Agreement duration, the estimated quantity in the case of procurement of goods, delivery schedule and/or time frame; and (iv) the obligations, duties, and/or functions of the winning bidder.

Care should be taken to check the relevance of the provisions of the PBDs against the requirements of the specific Goods to be procured. If duplication of a subject is inevitable in other sections of the document prepared by the Procuring Entity, care must be exercised to avoid contradictions between clauses dealing with the same matter.

Moreover, each section is prepared with notes intended only as information for the Procuring Entity or the person drafting the Bidding Documents. They shall not be included in the final documents. The following general directions should be observed when using the documents:

- a. All the documents listed in the Table of Contents are normally required for the procurement of Goods. However, they should be adapted as necessary to the circumstances of the particular Procurement Project.
- b. Specific details, such as the “*name of the Procuring Entity*” and “*address for bid submission*,” should be furnished in the Instructions to Bidders, Bid Data Sheet, and Special Conditions of Contract. The final documents should contain neither blank spaces nor options.
- c. This Preface and the footnotes or notes in italics included in the Invitation to Bid, Bid Data Sheet, General Conditions of Contract, Special Conditions of Contract, Schedule of Requirements, and Specifications are not part of the text of the final document, although they contain instructions that the Procuring Entity should strictly follow.

- d. The cover should be modified as required to identify the Bidding Documents as to the Procurement Project, Project Identification Number, and Procuring Entity, in addition to the date of issue.
- e. Modifications for specific Procurement Project details should be provided in the Special Conditions of Contract as amendments to the Conditions of Contract. For easy completion, whenever reference has to be made to specific clauses in the Bid Data Sheet or Special Conditions of Contract, these terms shall be printed in bold typeface on Sections I (Instructions to Bidders) and III (General Conditions of Contract), respectively.
- f. For guidelines on the use of Bidding Forms and the procurement of Foreign-Assisted Projects, these will be covered by a separate issuance of the Government Procurement Policy Board.

The Special Conditions of Contract (SCC) complement the GCC, specifying contractual requirements linked to the special circumstances of the Procuring Entity, the Procuring Entity's country, the sector, and the Goods purchased. In preparing this Section, the following aspects should be checked:

- a. Information that complements provisions of the GCC must be incorporated.
- b. Amendments and/or supplements to provisions of the GCC as necessitated by the circumstances of the specific purchase, must also be incorporated.

However, no special condition which defeats or negates the general intent and purpose of the provisions of the GCC should be incorporated herein.

Section VII. Technical Specifications

Notes for Preparing the Technical Specifications

A set of precise and clear specifications is a prerequisite for Bidders to respond realistically and competitively to the requirements of the Procuring Entity without qualifying their Bids. In the context of Competitive Bidding, the specifications (*e.g.* production/delivery schedule, manpower requirements, and after-sales service/parts, descriptions of the lots or items) must be prepared to permit the widest possible competition and, at the same time, present a clear statement of the required standards of workmanship, materials, and performance of the goods and services to be procured. Only if this is done will the objectives of transparency, equity, efficiency, fairness, and economy in procurement be realized, responsiveness of bids be ensured, and the subsequent task of bid evaluation and post-qualification facilitated. The specifications should require that all items, materials and accessories to be included or incorporated in the goods be new, unused, and of the most recent or current models, and that they include or incorporate all recent improvements in design and materials unless otherwise provided in the Contract.

Samples of specifications from previous similar procurements are useful in this respect. The use of metric units is encouraged. Depending on the complexity of the goods and the repetitiveness of the type of procurement, it may be advantageous to standardize the General Technical Specifications and incorporate them in a separate subsection. The General Technical Specifications should cover all classes of workmanship, materials, and equipment commonly involved in manufacturing similar goods. Deletions or addenda should then adapt the General Technical Specifications to the particular procurement.

Care must be taken in drafting specifications to ensure that they are not restrictive. In the specification of standards for equipment, materials, and workmanship, recognized Philippine and international standards should be used as much as possible. Where other particular standards are used, whether national standards or other standards, the specifications should state that equipment, materials, and workmanship that meet other authoritative standards, and which ensure at least a substantially equal quality than the standards mentioned, will also be acceptable. The following clause may be inserted in the Special Conditions of Contract or the Technical Specifications.

Sample Clause: Equivalency of Standards and Codes

Wherever reference is made in the Technical Specifications to specific standards and codes to be met by the goods and materials to be furnished or tested, the provisions of the latest edition or revision of the relevant standards and codes shall apply, unless otherwise expressly stated in the Contract. Where such standards and codes are national or relate to a particular country or region, other authoritative standards that ensure substantial equivalence to the standards and codes specified will be acceptable.

Reference to brand name and catalogue number should be avoided as far as possible; where unavoidable they should always be followed by the words “*or at least equivalent.*” References to brand names cannot be used when the funding source is the GOP.

Where appropriate, drawings, including site plans as required, may be furnished by the Procuring Entity with the Bidding Documents. Similarly, the Supplier may be requested to provide drawings or samples either with its Bid or for prior review by the Procuring Entity during contract execution.

Bidders are also required, as part of the technical specifications, to complete their statement of compliance demonstrating how the items comply with the specification.

Technical Specifications

Item	Specification	Statement of Compliance
		<p><i>[Bidders must state here either “Comply” or “Not Comply” against each of the individual parameters of each Specification stating the corresponding performance parameter of the equipment offered. Statements of “Comply” or “Not Comply” must be supported by evidence in a Bidders Bid and cross-referenced to that evidence. Evidence shall be in the form of manufacturer’s un-amended sales literature, unconditional statements of specification and compliance issued by the manufacturer, samples, independent test data etc., as appropriate. A statement that is not supported by evidence or is subsequently found to be contradicted by the evidence presented will render the Bid under evaluation liable for rejection. A statement either in the Bidder’s statement of compliance or the supporting evidence that is found to be false either during Bid evaluation, post-qualification or the execution of the Contract may be regarded as fraudulent and render the Bidder or supplier liable for prosecution subject to the applicable laws and issuances.]</i></p>
TERMS OF REFERENCE		
OWWA VIRTUAL MACHINE AND CLOUD COMPUTING SUBSCRIPTION		
	<p>Background</p> <p>OWWA’s digital transformation program entails the development of applications and solutions that will make its programs and services more accessible to OFWs around the world. The web and mobile applications being developed revolves around OWWA’s main data source which is the OFW membership and payment system. There is also a determined move towards data collaboration among government agencies, particularly those dealing with the Filipino labor force. With this, OWWA has decided to adopt</p>	

<p>virtualization and cloud technology solutions in support of the government’s efforts to streamline ICT resources to cut back on hardware and operations cost and improve overall operational efficiency.</p> <p>Using cloud technology, OWWA will have the flexibility to place applications and data on the appropriate cloud platform based on business processes and regulatory needs. It will also achieve global scalability and maximum productivity for OWWA regional and overseas offices by taking advantage of solutions in infrastructure as a service (IaaS) and platform as a service (PaaS).</p> <p>More importantly, moving towards the cloud computing platform will allow OWWA to build apps faster, focusing on innovation instead of infrastructure management. It will also be assured of data, applications and systems protection no matter where they reside to avoid costly business interruptions.</p>	
<p>Objectives:</p> <ol style="list-style-type: none"> 1. Optimize OWWA’s existing assets by using a hybrid cloud approach to seamlessly integrate applications, data, and processes across both on-premises and cloud sources. 2. Handle exponential data growth by employing a scalable data warehousing model with more budget flexibility for batched-based workloads. 3. Build intelligent solutions that would benefit OFWs faster using any language or development tool such as cognitive APIs, bots and blockchain. 4. Embed security, privacy, and compliance into OWWA’s development methodology using a cloud provider that is trusted by most government institutions to protect organizational and OFW data. <p>General Requirements:</p> <ul style="list-style-type: none"> • The system shall provide users with a secure cloud-based unified communication and collaboration system. • Cloud computing services are auto scalable, have zero downtime, and are secure. • The system shall be accessible using any device -Windows, MacOS, Android and iOS. • First party single sign on capability with OWWA’s identity and access management service • The solution should enable seamless resource/workload movement from cloud source to destination. • The cloud service provider offers better security for applications and data than the security would attain in house. • The solution must have an IaaS that provides all the infrastructure to support web apps, including storage, web and application servers, and networking resources. 	

- The solution must simplify planning and management of backup and recovery systems.
- The solution must have Microsoft Defender for cloud.
- The solution must have DevOps tool.
- The solution must have equivalent server specifications based on the existing solution.
- The solution must have an interactive Graphical User Interface (GUI) accessible in any location that allows the cloud administrators and development teams to conveniently access, manage, provision, and modify all cloud services and components instantly and securely. Multi-factor Authentication is recommended.
- The solution must have monitoring tools/s for application performance, analytics, system health and diagnostic logs.
- Security can secure the workloads with step-by-step actions that protect the workloads from known security risks.
- Security can defend the workloads in real-time so can react immediately and prevent security events from developing.
- Security has advanced threat protection features for virtual machines, SQL databases, containers, web applications, your network, and more.
